### DETAILED ACTION

1. This action is responsive to communications filed 3/1/04.
2. This application is in condition for allowance except for the following formal matters:

.This application contains a computer program listing of more than three hundred (300) lines. In accordance with 37 CFR 1.96(c), a computer program listing contained on more than three hundred (300) lines, must be submitted as a computer program listing appendix on compact disc conforming to the standards set forth in 37 CFR 1.96(c)(2) and must be appropriately referenced in the specification (see 37 CFR 1.77(b)(4)). Accordingly, applicant is required to cancel the current computer program listing, file a computer program listing appendix on compact disc in compliance with 37 CFR 1.96(c), and insert an appropriate reference to the newly added computer program listing appendix on compact disc at the beginning of the specification.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

### ***Allowable Subject Matter***

3. Claims 1-33 are allowed.
4. The following is an examiner's statement of reasons for allowance:

In reference to claims 1, 11, 16, 25, and 30, none of the references, either singularly or in combination, teach or fairly suggest the elements of present invention.

Nguyen teaches a method for manipulating an HTML input form via a browser by selecting functions and entering data into input boxes, receiving the input form, extracting information, and substituting the inputs into an SQL query, and outputting the results into a file that is translated into an HTML report; however he does not teach this system of presenting the predefined operation types to construct a wrapper in a system for semi-structured information nor does he teach that the operation types include retrieving web documents, following links within the retrieve web documents, and extracting desired items from the retrieved web documents for storage in a structured format.

Iizuka teaches an integrated retrieval scheme for retrieving semi-structured documents; however, he does not teach the construction of a wrapper while generating and displaying the wrapper on a display screen nor does he teach presenting the user with predefined operation types from which to construct a wrapper.

Washington teaches editing a control utilizing a preview window to view changes made to the control; however he does not teach this for semi-structured information nor does he teach that the operation types include retrieving web documents, following links within the retrieve web documents, and extracting desired items from the retrieved web documents for storage in a structured format.

Therefore claims 1-33 are in condition of allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
